ICG ITALIA PRESENTS

PORCELAIN 102 LESSONS: THE EDUCATION CONTINUES

The goal of this course is to provide architects and designers with a comprehensive understanding of porcelain slabs and their applications, particularly for countertops and surfaces. We will cover everything from the composition and manufacturing process of the slabs to understanding the value engineering and innovative technologies, as well as showcase practical examples of their use in design.

LEARNING OBJECTIVES

- Understand the types of material available for countertops and surfaces, including pros and cons of each material.
- Learn composition and manufacturing process for porcelain slabs.
- Discuss Value Engineering as it relates to slabs.
- Review practical examples of porcelain slab use and design, including innovation.

IDCEC COURSE NUMBER: CC125903 | **AIA COURSE NUMBER:** SPEEC02
LENGTH/CREDIT: 0.1 CEU | **CREDIT DESIGNATION:** HSW

Disclaimer:

This Continuing Education Course is delivered by ICG Italia and meets its eligibility criteria, with accreditation formally noted under "Stonepeak."

FORMAT:

This workshop is presented through a visual presentation and discussion.

COST:

Free.

FACILITATOR QUALIFICATIONS:

Facilitators are considered experts in the tile industry. They are also trained presenters.

TARGET AUDIENCE:

Anyone who is interested in learning about the nature of porcelain tile, such as architects, specifiers and other design professionals. This program is open to every experience level and includes a question and answer session to address specific interests.
